SAMUEL D. CONTE
DISTINGUISHED
LECTURE SERIES

Sept. 16
Kavita Bala
Cornell University
Computer Science Department, Chair and Professor
1142 | 2:30-4:00

Oct. 2
Natalie Enright Jerger
University of Toronto
Percy Edward Hart Professor of Electrical and Computer Engineering
1142 | 2:30-4:00

Oct. 29
Raghu Ramakrishnan
University of Wisconsin, Madison
Professor of Computer Sciences
1142 | 4:00-5:30

Nov. 4
Michael Stonebraker
Massachusetts Institute of Technology
Adjunct Professor of Computer Science
1142 | 3:30-5:00

Samuel D. Conte (1917-2002) founded the Department of Computer Science at Purdue University in 1962. His vision and active involvement nationally and internationally played a vital role in defining the discipline of computer science worldwide.

• Each year, the Department of Computer Science faculty identify computer scientists who are recognized as leaders in the field and whose ideas and research command the attention of the students and faculty. A select group of individuals are then invited to be a part of the annual Samuel D. Conte Distinguished Lecture Series on Computer Science.

• In 1993, the Samuel D. Conte Endowment was established to honor Dr. Conte and his devotion to excellence in teaching and research in computer science. The Samuel D. Conte Lecture Series, sponsored by the endowment, serves as a permanent testimonial of his contributions to the Department of Computer Science, Purdue University, and the computing field.
