CS 63500
Spring 2018
Voicu Popescu
Due: Sunday March 25th at 11:59pm

Project proposal

In a nutshell
Write a maximum two page final project proposal.

Details
1. Formatting: use a two-column paper format, e.g. IEEE or ACM; use Latex or Word, to take advantage of the template provided to you on the IEEE or ACM websites
2. On at most two pages, provide the following information about your project
   a. Title
   b. Abstract
   c. Introduction: problem, problem importance, shortcoming of existing (other) approaches, proposed approach
   d. Method details: input, how the input is processed, output, output quality metrics
   e. Midway milestones: what you will have working by approximately April 10-15
   f. Completion criteria: what you will demonstrate by the final project presentation, approximately the last week of classes
3. Build a five slide presentation of your project, which you will be using in class on Tuesday March 27th for your project proposal presentation.

Turn in via blackboard
An archive that contains:
- The PDF of your proposal
- A five slide presentation of your project proposal; any format is accepted
