

Advice About A Research Career

Douglas E. Comer
Distinguished Professor of Computer Science

Abstract. A successful researcher will share career advice for beginning researchers. The topics include: how to get started, how to build a reputation, and how to excel. The speaker will share secrets that led to his success, including how to choose topics, when to publish, and how to optimize the impact of your work. The speaker has experience in both academic and industrial research, and has given the talk in both venues.
