SERC Retreat

by Aditya P. Mathur

Oh! This SERC retreat
   Is it a treat?
With so much technical meat
   It does provide an off-beat!

We talk of collaboration
   'Cause they like sensation
When we can't think of any temptation
   We replace it by COORDINATION

Some go to the beach
   While they are on retreat
Some like to see it bare
   But they do not dare!

Some loose their kids
   Even before they made a bid
Others loose their minds
   So what if it's not worth any kind!

We beat and we eat
   Ideas! That's how we treat
We chatter and we splatter
   To get to the truth of the matter

Together we can take
   a stance with no brakes
And each other we treat,
   once in a while with a retreat

SERC is not for jerks
   Even though there are no perks!
Quirks do not, here, lurk
   We are the Software Engineering's young turks!

Please, let's keep retreating
   'cause that's how we advance
We need to keep perpetuating
   to remain out of trans.
