Motility/Flagella
Transport
Mediator Processes
Signaling
Metabolism
Response
chemotaxis
positive regulation of transcription, DNA-dependent
phosphoenolpyruvate-dependent sugar phosphotransferase syste
positive regulation of transcription
molybdate
L-ascorbic acid metabolism
nitrate metabolism
protein secretion
phosphonate transport
branched chain family amino acid metabolism
cell morphogenesis
protein transport
flagellum biogenesis
histidyl-aspartyl phosphorelay
amino acid formation
carbohydrate transport
metabolism
cellular metabolism
DNA recombination
electron transport
glucose metabolism
transport
aromatic compound metabolism
energy pathways
alcohol metabolism
lipid metabolism
fatty acid metabolism
transcription
regulation of transcription, DNA-dependent
response to stimulus
nitrogen
regulation of transcription
proteolysis
amino acid metabolism
DNA metabolism
carboxylic acid metabolism
organic acid metabolism
carbohydrate metabolism
branched chain family amino acid formation
negative regulation of transcription, DNA-dependent
negative regulation of transcription
