Homework # 3

5. When should duplicates be allowed in a relation?

6. What is a view? What is a materialized view? What do we mean by view maintenance? Give an example of each of the above concepts.

7. Under what conditions, should we allow null values in a database? How do aggregate functions treat null values?

8. What is referential integrity? Give an example.

9. What are the different types of integrity constraints? Give examples.
