

Final Project Presentation Rubric

Your team will give a presentation over your work this semester. You will be given a 15 minute time slot to present your work and may use the time as you wish. It is important for all group members to attend this presentation. Please try to answer the following questions as your score will be based on how well you address these:

1. How you used Design Inspection, Code Inspection, Unit Testing, Incremental Testing, and Regression Testing on your own software product (4 points)
 - a. Which things worked well?
 - b. Which did not?
 - c. What would you do differently in Inspection and Testing if you could do it all over again?
 - d. What strategy did you use to seed your software product with defects?
2. How you did Black Box Testing and White Box Testing on another team's software (6 points)
 - a. Assess your Test Plan.
 - b. Assess the Black Box Testing portion of testing.
 - c. How many defects did you find?
 - d. Assess the White Box Testing portion of testing.
 - e. How many more defects did you find?
 - f. Assess your corrections for defects.

Total Points: 10 (10% of your project grade)
