By the end of this class,

• Evaluate a host of different expressions in Julia related to matrices and vectors

• Understand how to work with for loops and control flow in Julia

• Understand how to work with functions in Julia

• See some notes on plotting functions

August 26, 2016

Julia – matrices & vectors, functions, types, etc.

Next class

Review of Julia
G&C - Chapter 2

Next next class

Intro to floating point arithmetic
G&C – Chapter 5
