CS 182: Foundations of Computer Science
Last edited: December 7, 2017

Course Web Page: Blackboard Learn

Lecture (LE 1):
Instructor: Prof. Petros Drineas
TAs and office hours: check Blackboard Learn
Instructor’s e-mail: pdrineas@purdue.edu

Lecture (LE 2):
Instructor: Prof. Susanne Hambrusch
TAs and office hours: check Blackboard Learn
Instructor’s e-mail: seh@purdue.edu

Course Outline
The references to textbook chapters is approximate. For some topics, additional resources will be used. See the course web page for a detailed, lecture-by-lecture, course outline.

- Logic (KR 1.1-1.6)
- Proofs (KR 1.7-1.8)
- Functions, Sums, Sets (KR 2.1-2.5)
- Algorithms and growth of functions (KR 3)
- Induction, recursion, and recursive algorithms (KR 5.1-5.4)
- Counting (KR 6)
- Basic probability theory (KR 7.1-7.2)
- Relations (KR 9.1-9.2)
- Trees and graphs (KR 10.1-10.3, 11.1)
- Finite state automata, regular expressions, and context-free languages (KR 13.1-13.4)
- Turing machines, countable vs. uncountable, uncomputable functions (KR 13.5)

Prerequisites and learning objectives
CS 180 and Math 161 (or equivalent). The main learning objectives are understanding and knowing how to apply fundamental discrete mathematical tools, facts, and reasoning relevant to computer science.
Requirements, Grading, and Expectations

The course work consists clicker participation, homeworks, two midterms, and the final. The course grade is based on:

- **Clicker participation (5%)**
  - You are expected to have your own clicker and have it registered on BB by the first lecture.
  - Clickers will be used in class at least once a week. The two lowest clicker scores throughout the semester will be dropped.
  - **There are no makeup options for missed clicker questions.** It is your responsibility to attend every lecture and bring your registered clicker to class in order to get credit for clicker questions.

- **Homeworks (25%)**
  - There will be nine or ten homeworks. Homeworks must be submitted via Blackboard before the stated deadline.
  - Students are expected to type their assignments, using Latex, MS Word, or any editor of comparable quality. Submitted files should be Acrobat (.pdf) files (no .docx, .rtf, .txt, .html, etc.). Figures, diagrams, and more complex mathematical notations can be handwritten and included into the final .pdf as an image.
  - Students are allowed two uploads to BB for each homework. We will only grade the latest upload. After submitting your homework, download the file and open it to ensure a valid .pdf file was uploaded.
  - **No late assignments will be accepted.**

- **Midterms (20%+20%)**
  - There will be two evening midterms, each accounting for 20% of the overall course grade. Both midterms will be 60-minute evening exams and are closed book (no books, no laptops, no cell phones, no calculators, etc.).
  - Midterm 1: Tuesday, February 13, 6:30-7:30 pm.
  - Midterm 2: Thursday, April 5, 8:00-9:00 pm.
  - You are allowed one double-sided A4 page of notes for each midterm. Each midterm will cover a subset of the course lectures, which will be announced at Blackboard.

- **Final (30%)**
  - There will be a **cumulative** final exam (e.g., the final exam will cover material from the whole course). The date of the final exam is set by the university and it could be scheduled for Saturday, May 5. **Do not** make travel plans before the final exam schedule is released.
  - The final is closed book (no books, no laptops, no cell phones, no calculators, etc.). You are allowed **two** double-sided A4 page of notes for the final.
  - Taking the final exam is a requirement for passing the course.

---

1. There are multiple online converters that can convert files of any type to .pdf files.
Other

- **PSO (Practice/Study/Observation):** The goal of the PSOs is to practice material covered in class. All PSO sessions will cover the same material and the focus is on students solving additional problems. PSOs are typically led by a graduate TA. Undergraduate TAs may be present to provide additional help. Attendance is strongly encouraged.

- **Channels of Communication:** Your first point of contact for questions related to the technical content of the lectures and homework problems should be the graduate TAs of your PSO session, everyone staffing 182 office hours, and the Head TA. For questions outside PSOs and office hours, use email. While you should contact the instructor in case of an emergency (e.g., if you are unable to make the midterm and have a valid medical excuse by the appropriate campus authorities), questions on content and homework should not go to the instructor as responses will not happen promptly. Effort will be made to respond to email questions promptly. However, responses can take longer than 24 hours. Keep this in mind as you are working on homework problems and preparing for exams. Take advantage of office hours and PSOs as much as possible.

- **Regrading Requests.** If you request a re-grade of a homework or midterm, you must contact the TA of your Practice Study Observation (PSO) session within 10 days of receiving your homework or midterm back. There will be no re-grading after this time period has elapsed. You are expected to read and work through posted solutions before asking for a regrade.

- **Missed exam.** Missing an exam results in a score of zero unless you have a valid excuse covered under university policies. If you are unable to attend an exam due to an illness or an emergency, contact the instructor before the exam, if possible.

- **Announcements:** Announcements relevant to the course will be made in class and/or via the Blackboard course email list. You are expected to monitor Blackboard and your email for information related to the class.

- **Discussion forum:** There will be a discussion forum on Blackboard; instructions and guidelines will be posted in Blackboard. You are expected to be courteous, respectful, and professional when posting at the discussion forum.

### Course and University Policies

**Conduct and Courtesy:** Students are expected to maintain a professional and respectful classroom environment. In particular, this includes: silencing personal electronics; arriving on time and remaining throughout the class; do not insult or deride others for any reason (even in jest); leave class promptly and wait to ask the instructor questions in the hall. You may use non-disruptive personal electronics during class.

**Missing or late work:** As discussed in the requirements and grading section, missing or late work will be counted as a zero.

**Academic integrity:** Behavior consistent with cheating, copying, and academic dishonesty is not tolerated. Depending on the severity, this may result in a zero score on the assignment or exam, and could result in a failing grade for the class. Purdue prohibits “dishonesty in connection
with any University activity. Cheating, plagiarism, or knowingly furnishing false information to the University are examples of dishonesty.” (Part 5, Section III-B-2-a, University Regulations) Furthermore, the University Senate has stipulated that “the commitment of acts of cheating, lying, and deceit in any of their diverse forms (such as the use of substitutes for taking examinations, the use of illegal cribs, plagiarism, and copying during examinations) is dishonest and must not be tolerated. Moreover, knowingly to aid and abet, directly or indirectly, other parties in committing dishonest acts is in itself dishonest.” (University Senate Document 72-18, December 15, 1972).

You are expected to read both Purdue’s guide to academic integrity (http://www.purdue.edu/purdue/about/integrity_statement.html) and Prof. Gene’s Spafford’s guide (http://spaf.cerias.purdue.edu/integrity.html) as well. You are responsible for understanding their content and how it applies to this class.

**Attendance:** Students are expected to be present for every meeting of the classes in which they are enrolled.

**Grief Absence Policy:** Purdue University recognizes that a time of bereavement is very difficult for a student. The University therefore provides the following rights to students facing the loss of a family member through the Grief Absence Policy for Students (GAPS). According to GAPS Policy, students will be excused for funeral leave and given the opportunity to earn equivalent credit and to demonstrate evidence of meeting the learning outcomes for missed assignments or assessments in the event of the death of a member of the student’s family.

**Violent Behavior Policy:** Purdue University is committed to providing a safe and secure campus environment for members of the university community. Purdue strives to create an educational environment for students and a work environment for employees that promote educational and career goals. Violent Behavior impedes such goals. Therefore, Violent Behavior is prohibited in or on any University Facility or while participating in any university activity.

**Students with Disabilities:** Purdue University is required to respond to the needs of the students with disabilities as outlined in both the Rehabilitation Act of 1973 and the Americans with Disabilities Act of 1990 through the provision of auxiliary aids and services that allow a student with a disability to fully access and participate in the programs, services, and activities at Purdue University.

If you have a disability that requires special academic accommodation, please make an appointment to speak with the Head TA or instructor within the first three (3) weeks of the semester in order to discuss any adjustments. It is important to talk about this at the beginning of the semester. It is the student’s responsibility to notify the Disability Resource Center (http://www.purdue.edu/drc) of an impairment/condition that may require accommodations and/or classroom modifications.

**Emergencies:** In the event of a major campus emergency, course requirements, deadlines and grading percentages are subject to changes that may be necessitated by a revised semester calendar or other circumstances beyond the instructors control. Relevant changes to this course will be posted onto the course website and/or announced via email. You are expected to read your purdue.edu email on a frequent basis.

**Emergency Preparedness:** Emergency notification procedures are based on a simple concept: *If you hear a alarm inside, proceed outside. If you hear a siren outside, proceed inside.* Indoor Fire Alarms are meant to stop class and immediately evacuate the building. Proceed to your Emergency Assembly Area away from building doors. Remain outside until police, fire, or other emergency response personnel provide additional guidance or tell you it is safe to leave. All Haz-
ards Outdoor Emergency Warning sirens mean to immediately seek shelter (Shelter in Place) in a safe location within the closest building. “Shelter in place” means seeking immediate shelter inside a building or University residence. This course of action may need to be taken during a tornado, a civil disturbance including a shooting or release of hazardous materials in the outside air. Once safely inside, find out more details about the emergency. Remain in place until police, fire, or other emergency response personnel provide additional guidance or tell you it is safe to leave. In both cases, you should seek additional clarifying information by all means possible: Purdue Home page, email alert, TV, radio, etc. Review the Purdue Emergency Warning Notification System multi-communication layers at http://www.purdue.edu/ehps/emergency_preparedness/warning-system.html. Please review the Emergency Response Procedures at https://www.purdue.edu/emergency_preparedness/flipchart/index.html.

Please review the evacuation routes, exit points, emergency assembly area and shelter in place procedures and locations for our building. Video resources include a 20-minute active shooter awareness video that illustrates what to look for and how to prepare and react to this type of incident. See http://www.purdue.edu/securePurdue/news/2010/emergency-preparedness-shots-fired-on-campus.cfm

Nondiscrimination: Purdue University is committed to maintaining a community which recognizes and values the inherent worth and dignity of every person; fosters tolerance, sensitivity, understanding, and mutual respect among its members; and encourages each individual to strive to reach his or her own potential. In pursuit of its goal of academic excellence, the University seeks to develop and nurture diversity. The University believes that diversity among its many members strengthens the institution, stimulates creativity, promotes the exchange of ideas, and enriches campus life.

Purdue University prohibits discrimination against any member of the University community on the basis of race, religion, color, sex, age, national origin or ancestry, marital status, parental status, sexual orientation, disability, or status as a veteran. The University will conduct its programs, services and activities consistent with applicable federal, state and local laws, regulations and orders and in conformance with the procedures and limitations as set forth in Executive Memorandum No. D-1, which provides specific contractual rights and remedies.

Instructors' absence: Video lectures may be used to supplement missing class periods.

Changes to the course syllabus: This syllabus is subject to change. Updates will be posted at the course website.
